

ATTACHMENT B

Amendment to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-10. (Canceled)

11. (Currently amended) An adhesive dressing comprising a backing layer characterised in that the backing layer is substantially coated on at least one surface thereof with an adhesive composition according to ~~claim 5~~comprising a switchable polymer capable of being influenced by radiation to change from one state to another, comprising a backbone polymeric moiety having a plurality of curable residues bonded thereto, wherein the polymer comprises monomer residues each of which monomers comprises at least two reactive groups, one of which is curable but unreactive under conditions under which at least one of the remaining groups undergoes a reaction to form the polymer.

12. (Currently amended) A hardenable tape or bandage comprising a backing layer characterised in that the backing layer is substantially coated on at least one surface thereof and/or impregnated or encapsulated with a hardenable composition according to ~~claim 6~~comprising a switchable polymer capable of being influenced by radiation to change from one state to another, comprising a backbone polymeric moiety having a plurality of curable residues bonded thereto, wherein the polymer comprises monomer residues each of which monomers comprises at least two reactive groups, one of which is curable but unreactive under conditions under which at least one of the remaining groups undergoes a reaction to form the polymer.
